

In our development group, Aquaporin A/S is seeking an experienced

## Chemical Engineer / Process Engineer

starting in April 2012. Together with our development team you will work with the development and optimization of our Aquaporin Inside™ membrane technology. The team's responsibility is to improve the performance of our biomimetic water membrane while lowering the cost of goods at the same time.

### Your qualifications

Your background should be in chemical engineering or technical sciences focusing on real world challenges rather than academic questions. Your main task will be to transfer our existing laboratory protocols into a pilot scale production line.

We are looking for a candidate having relevant industrial working experience from minimum two of the following areas: Chemical engineering, membrane technology, surface chemistry (industrial scale), machine construction, production line setup and quality control.

You should be able to work independently, however, you will need to be a proactive team-player and capable of adapting to fast changes. Despite Aquaporin being a Danish company, we expect that you have a good command of the English language as you will have to communicate with our partners around the globe and our subsidiary located in Singapore.

### We offer

An international team of highly motivated experts spanning from plumbing to high tech biotechnology in a very good working atmosphere located at new facilities in the centre of Copenhagen. We will provide you with a salary corresponding to your skills and qualifications.

### Your application

Your application should be addressed to [aquaporin@aquaporin.dk](mailto:aquaporin@aquaporin.dk) and should have reached us by February 22<sup>nd</sup>, 2012 the latest. It should include your resume and a brief statement why we should choose you to fill this position. Please use the term "Chemical Engineer/Process Engineer" in the subject line of your e-mail.

### Further information

For further information please visit our website [www.aquaporin.dk](http://www.aquaporin.dk) or call our CTO Oliver Geschke at tel. +45 27 10 20 78.

We strongly believe that the Aquaporin Inside™ membrane technology will revolutionise water purification worldwide.

## Join the water revolution!

### About us

Aquaporin A/S is a Danish cleantech company located at the technology incubator COBIS in the centre of Copenhagen with a subsidiary in Singapore. We are dedicated to revolutionising water purification by means of industrial biotech techniques and thinking. The use of biotechnological principles in a technological context is a novel upcoming field with large commercial perspectives.
